Brussels, March 2023

## ChargeUp Europe welcomes Zunder as its latest member

Zunder is the leading independent fast and ultra-fast charging operator for all electric vehicles in Spain. The company has the support of international investors such as White Summit Capital or Mirova, which recently invested 100 million euros in the company.

The growth of the company is not limited to the Spanish territory. In 2022 it began its international expansion, having won its first public tender in France and reaffirming its ambition to deploy and operate more than 4,000 charging stations and manage more than 40,000 charge points through its platform in 2025, with an investment plan of €300M for that same period.

Saul Lopez, Director for International Development at Zunder, said, "Zunder is excited to join the voice of the EV charging infrastructure industry in Europe. We have a strong position in Spain, and we will continue deploying our fast-charging hubs in Europe with a focus on France, Italy, and Portugal. Joining forces with ChargeUp Europe is hence a natural step for us as we share common goals, such as working towards an expeditious and effortless rollout of EV charging infrastructure in Europe."

Commenting on the announcement, ChargeUp Europe Secretary General Lucie Mattera stated, "We are thrilled to welcome Zunder as the 27th member of ChargeUp Europe. Their diverse charging infrastructure, and a fast-developing state-of-the-art network makes our alliance even stronger. It is our privilege to join forces towards a broad and speedy rollout of EV charging infrastructure, enabling transport decarbonisation in the EU."

### About ChargeUp Europe

ChargeUp Europe is the industry association for the electric vehicle (EV) charging infrastructure sector. Our association works to accelerate the switch to zero emission mobility and ensure that EV drivers can enjoy a seamless charging experience with access to high quality, readily available charging infrastructure across Europe. As of today, our member companies are active in all 27 EU Member States, the UK and EFTA, with over 500,000 charging points in the EU.
