ChargeUp Europe welcomes Be Charge as its latest member

ChargeUp Europe, the voice of the EV charging infrastructure industry in Europe, is delighted to welcome Be Charge, the company owned by Plenitude (Eni), as its latest member company.

Be Charge is an integrated operator for electric mobility controlled by Plenitude through Be Power dedicated to the dissemination of charging infrastructures for electric mobility. Thanks to one of the most widespread networks of public charging infrastructures for electric vehicles in Europe, Be Charge wants to make a decisive contribution to the development of a sustainable mobility system through the innovative management of digital flows. To date, all the energy supplied by its network is certified renewable. Be Charge plays both the role of owner and manager of the charging station system (CSO), and that of a provider of charging and electric mobility services that interface with users of electric vehicles (EMSP).

Since its launch in late 2020, ChargeUp Europe has now grown to 23 full industry members, three knowledge partners, and five ecosystem partners, all working together to accelerate the rollout of EV charging infrastructure and enable seamless charging for drivers across the EU.

About ChargeUp Europe

ChargeUp Europe is the industry association for the electric vehicle (EV) charging infrastructure sector. Our association works to accelerate the switch to zero emission mobility and ensure that EV drivers can enjoy a seamless charging experience with access to high quality, readily available charging infrastructure across Europe. As of today, our 23 member companies are active in all 27 EU Member States, the UK and EFTA, with over 300,000 charging points in the EU.
