

## Press Release

Brussels, June 2022

# ChargeUp Europe welcomes Plugsurfing as its latest member

ChargeUp Europe, the voice of the EV charging infrastructure industry in Europe, is delighted to welcome Plugsurfing as its latest member company.

Plugsurfing is dedicated to bringing the carefree drive back to EV drivers through an alliance of all stakeholders of the public charging ecosystem. They bring drivers, charging point operators, and carmakers together through a single platform. Drivers benefit from reliable access to public chargers, charge point operators a scalable back-end, and carmakers integrations for their customers to charge on our network.

Since its launch in late 2020, ChargeUp Europe has now grown to 22 full industry members, three knowledge partners, and five ecosystem partners, all working together to accelerate the rollout of EV charging infrastructure and enable seamless charging for drivers across the EU.

Commenting on the announcement, Tatu Kulla, CEO at Plugsurfing, said: "At Plugsurfing, we believe that to make e-mobility go mainstream, the whole industry needs to work together. Joining ChargeUp Europe is a natural step for us to break barriers and collaborate while setting the standards that will define the charging experience. We look forward to bringing the carefree drive to EV drivers across Europe with our new fellow members."

### About ChargeUp Europe

ChargeUp Europe is the industry association for the electric vehicle (EV) charging infrastructure sector. Our association works to accelerate the switch to zero emission mobility and ensure that EV drivers can enjoy a seamless charging experience with access to high quality, readily available charging infrastructure across Europe. As of today, our 22 member companies are active in all 27 EU Member States, the UK and EFTA, with over 300,000 charging points in the EU.
