

Press Release - December 2023

ChargeUp Europe welcomes Alpitronic as Full Industry Member, Marking the 30th Milestone

ChargeUp Europe, the voice of the EV charging infrastructure industry in Europe, is proud to announce that Alpitronic has joined the association as a full industry member. Alpitronic is the 30th full industry member to join the association since it was formally established in December 2020, marking a significant milestone.

Alpitronic, a distinguished manufacturer of EV chargers and power electronics testing solutions for the automotive and industrial industries, brings invaluable expertise and innovation to the ChargeUp Europe membership. Since 2017, Alpitronic has been renowned for its DC fast chargers designed for electric vehicles in the power range between 50 kW and 400 kW. The products, managed under the Hypercharger brand, exemplify their commitment to delivering high-performance and reliable charging solutions. With a compact footprint and advanced design, these solutions aim to contribute to the future of e-mobility.

"We are delighted to welcome Alpitronic to ChargeUp Europe as our 30th full industry member! The collaboration with Alpitronic marks a pivotal moment for ChargeUp Europe, emphasizing the importance of collective efforts in advancing a seamless charging experience for EV drivers of all types. We look forward to involving Alpitronic in our group of industry leaders, pooling expertise to accelerate the transition to e-mobility." said Lucie Mattera, Secretary General of ChargeUp Europe.

This partnership underscores the commitment of both ChargeUp Europe and Alpitronic to contribute significantly to the growth of electric mobility. Together, they will continue to work towards a seamless EV charging experience, playing a decisive role in shaping the future of e-mobility across the continent.

Highlighting the importance of this collaboration, Philipp Senoner, the CEO of Alpitronic, said,

"We are delighted to announce our membership in ChargeUp Europe. This collaboration provides us with various opportunities for development, including direct communication with policymakers and active engagement with the community in a supportive environment dedicated to a shared industry cause. We look forward to actively participating in the dynamic ChargeUp Europe community, gaining knowledge from other partners, and contributing our expertise to collectively drive the future of clean energy."

About ChargeUp Europe

ChargeUp Europe is the industry association for the electric vehicle (EV) charging infrastructure sector. Our association works to accelerate the switch to zero emission mobility and ensure that EV drivers can enjoy a seamless charging experience with access to high quality, readily available charging infrastructure across Europe. As of today, our 30 full industry member companies are active in all 27 EU Member States, the UK and EFTA, with over 500,000 charging points in the EU.

About Alpitronic

Alpitronic, based in Bolzano, is a fast-growing and innovative tech company founded in 2009 as a startup for the development of power electronic systems. In addition to development activities for the automotive sector with renowned customers such as BMW and Daimler, Alpitronic has been engaged in the development, production and commercialization of scalable DC fast chargers for electrical vehicles in the power range between 50 kW and 400 kW since 2017. The products managed under the Hypercharger brand are characterized in particular by their reliability, compact footprint and advanced design. As of today, approximately 16.000 Hyperchargers (approximately 30.000 charging points) have been installed in the EU.
